Washington State Beekeepers Association maintains a research and scholarship fund in the memory of three distinguished Washington beekeepers; Roy Thurber, Carl Van Wechel and Alvina Timmons. This fund is supported by generous endowments from each of their families and from annual proceeds from our benefit auction and by contributions from our members and the public. We award annual scholarships and research grants to worthy students and researchers who are advancing the knowledge of apiary science. These funds are kept as separate accounts and used solely for such grants. Contributions in any amount are greatly appreciated (and tax deductible). Thank you.
